EDUCATION

Medi-Caps University — B.Tech, Computer Science & Engineering

Expected June 2029

CGPA: 8.99 | Currently in Second Year

Sendhwa Public School — Class XII (CBSE)

2024

Percentage: 94%

EXPERIENCE

AI Web Development Intern — InAmigos Foundation

July 2026 – August 2026

- Working on AI-integrated web development projects, contributing to feature development and implementation as part of the foundation's technical team.

Technical intern - Custom Logic Innovation

July 2026-Present

- Working on software development task, testing, debugging, documentation, and supporting the technical team on ongoing projects.

Open Source Contributor - ai-robots-txt

- Identified and resolved a bug in the ai-robots-txt repository; submitted pull request was reviewed and merged into the main branch.

ACHIEVEMENTS

- Selected for Round 2 of Flipkart GRiD 8.0, Flipkart's national-level tech competition — among a competitive pool of applicants across India.
- Hackathon Participant, Hack'vento (January 2026) — collaborated in a team to design and build a working prototype within a fixed time limit, covering ideation, development, and live demo.
- GDG Indore Hackathon (September 2026) - 2nd position

PROJECTS

The Boards — Off-Campus Internship Aggregator

[the-boards-lyart.vercel.app](#)

- Built and deployed a solo full-stack web app listing verified off-campus internships and programs (Microsoft Explore, GSoC, Outreachy, AICTE, Infosys Springboard, and more) for students outside the IIT/NIT circuit, with real eligibility, mode, and stipend details.
- Designed a filterable listing interface with a community submission form for adding new opportunities; built with HTML, CSS, and JavaScript

Personal Portfolio Website

[github.com/anshita-18h/portfolio](#)

- Designed and built a fully responsive personal portfolio from scratch using semantic HTML5 and custom CSS, with no front-end framework.
- Implemented a skills timeline, project showcase, and contact section; deployed live via GitHub Pages ([anshita-18h.github.io/portfolio](#)).

AURA — Jewellery E-Commerce Platform

[anshita-18h.github.io/jewellery-ecommerce/#/](#)

- Built a full-stack e-commerce site end-to-end (React + Vite frontend, Node.js/Express REST API, MySQL) for a Custom Logic Innovation internship project, covering product catalog, category/occasion/price filtering, cart, and guest or authenticated checkout.
- Implemented customer authentication, a session-based wishlist, and an order-history dashboard, alongside a role-based admin panel for product and order management.
- Deployed and connected a 3-tier architecture across separate platforms (GitHub Pages, Render, Aiven MySQL), independently debugging cross-origin auth, environment configuration, and production database issues.

TECHNICAL SKILLS

Languages: Python, JavaScript

Web Development: HTML, CSS, MERN Stack (MongoDB, Express.js, React, Node.js) — in progress

Tools & Platforms: Git, GitHub, VS Code, Vercel

ADDITIONAL INFORMATION

- Maintains an active GitHub profile with regular contributions and an active LinkedIn presence.
- Strong academic record with a CGPA of 8.99 through second year of the program.
